4 recalls listed by Transport Canada for this model year

- Airbag** 2026184 9 Apr 2026
Issue: On certain vehicles, the driver-front airbag inflator may not have been properly welded. As a result, the airbag module could separate from the steering wheel when it deploys in a crash. Safety Risk: An airbag that does not work properly could create an increased risk of injury in a crash. Corrective Action: Nissan will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the driver-front airbag inflator.
- Fuel system** 2010247 22 Jul 2010
Certain vehicles may not meet the requirements of the Canada Motor Vehicle Safety Standard (CMVSS) 301 - Fuel System Integrity. After a rear impact crash test during a compliance testing program, the post crash fuel spillage exceeded the limit specified by the standard. Should fuel leakage occur and be in close proximity to an ignition source it could result in a fire. Correction: Dealers will install a protector to the gasoline recirculation tube at the filler neck connection.
- Airbag** 2010235 16 Jul 2010
On certain vehicles, the passenger-side curtain airbag may have been incorrectly positioned during vehicle assembly. As a result, in certain types of crashes where side curtain airbag deployment is expected, a portion of the bag may be restricted from fully deploying. The side curtain airbag will still deploy in a timely manner, meeting or exceeding applicable safety standards. Correction: Dealers will replace the side curtain airbag. This action is a Customer Satisfaction Campaign and is not being conducted as per the requirements of the Motor Vehicle Safety Act.

Other

2009283 2 Oct 2009

On certain vehicles, material in the nut used to secure the sensor-transmitter of the Tire Pressure Monitoring System (TPMS) may corrode and crack in areas with heavy concentrations of road salt. If this occurs, the nut may come out of the TPMS sensor-transmitter causing a rapid loss of tire air pressure. This could adversely affect vehicle control and cause a crash resulting in property damage, personal injury or death. Correction: Dealers will replace the TPMS nut with a revised version.

Listed for the model year, not checked against your VIN. Nissan confirms which apply.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 1 live listings, as of 27 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | |
| [3] NHTSA recall records (United States), listed for the model year | [5] Live public dealer listings on Cardog, as of 27 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
