§1 IDENTITY [1]

Model year	2006	Engine	2.5 L, 4 cylinders
Make	Nissan	Fuel	Gasoline
Model	X-Trail	Drive	4WD
Trim	Not in the decode	Maker	NISSAN MOTOR COMPANY, LTD
Body	Sport Utility Vehicle	Plant	Miyawaka, Fukuoka, Japan

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/nissan/x-trail/2006

4 recalls listed by Transport Canada for this model year

Airbag

2020003 10 Jan 2020

Issue: This recall is for certain vehicles that had an airbag inflator replaced as a part of an earlier recall campaign. This recall provides a final repair. Long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, may eventually degrade the propellant contained in the passenger-front airbag. This could cause the airbag to deploy with more force than normal. If the airbag inflator ruptures, fragments could be propelled toward vehicle occupants or cause damage to the airbag assembly, preventing its proper function.

Safety Risk: If the vehicle is involved in a crash requiring an airbag deployment, the airbag inflator could rupture and create a risk of injury.

Corrective Actions: Owners will be notified by mail and instructed to take their vehicle to a dealer to inspect the passenger-front airbag inflator. The passenger-front airbag module or inflator will be replaced as necessary. Note: The Canadian climate results in the propellant degrading slowly. This recall is being conducted as a precaution to address future risk. It is expected that all airbag inflators will be replaced before their function would be affected.

Fuel system

2016633 15 Dec 2016

On certain vehicles, the fuel filler pipe could corrode and become perforated. This could allow fuel to leak onto the ground while refuelling the vehicle or shortly thereafter. Fuel leakage, in the presence of an ignition source, could result in a fire causing property damage and/or personal injury. Correction: Dealers will inspect and if necessary replace the fuel filler pipe. Note: This is an expansion of recall 2014-030.

Airbag

2015210 15 May 2015

On certain vehicles, the passenger (frontal) airbag inflator could produce excessive internal pressure during airbag deployment. Increased pressure may cause the inflator to rupture, which could allow fragments to be propelled toward vehicle occupants, increasing the risk of injury. This could also damage the airbag module, which could prevent proper deployment. Failure of the passenger airbag to fully deploy during a crash (where deployment is warranted) could increase the risk of personal injury to the seat occupant. Correction: Dealers will inspect and, if necessary, replace the passenger airbag inflator. Note: This is an expansion of recalls 2013117 and 2014566.

Fuel system

2014030 31 Jan 2014

On certain vehicles, the fuel filler pipe could corrode and become perforated. This could allow fuel to leak onto the ground while refuelling the vehicle or shortly thereafter. Fuel leakage, in the presence of an ignition source, could result in a fire causing property damage and/or personal injury. Correction: Dealers will replace the fuel filler pipe.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [3] Cardog market quote, same model year, 1 live listings, as of 28 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [4] Live public dealer listings on Cardog, as of 28 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
