§1 IDENTITY [1]

Model year	2007	Engine	3.5 L, 6 cylinders
Make	Infiniti	Fuel	Gasoline
Model	M35	Drive	4x2
Trim	Not in the decode	Maker	NISSAN MOTOR COMPANY, LTD
Body	Sedan	Plant	Tochigi, Kaminokawa, Japan

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/infiniti/m35/2007

3 recalls listed by Transport Canada for this model year

Airbag

2020003 10 Jan 2020

Issue: This recall is for certain vehicles that had an airbag inflator replaced as a part of an earlier recall campaign. This recall provides a final repair. Long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, may eventually degrade the propellant contained in the passenger-front airbag. This could cause the airbag to deploy with more force than normal. If the airbag inflator ruptures, fragments could be propelled toward vehicle occupants or cause damage to the airbag assembly, preventing its proper function.

Safety Risk: If the vehicle is involved in a crash requiring an airbag deployment, the airbag inflator could rupture and create a risk of injury.

Corrective Actions: Owners will be notified by mail and instructed to take their vehicle to a dealer to inspect the passenger-front airbag inflator. The passenger-front airbag module or inflator will be replaced as necessary. Note: The Canadian climate results in the propellant degrading slowly. This recall is being conducted as a precaution to address future risk. It is expected that all airbag inflators will be replaced before their function would be affected.

Airbag

2017023 12 Jan 2017

On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, could eventually degrade the propellant contained in the passenger frontal airbag. This could cause the airbag to deploy with more force than normal. As a result, if the vehicle were involved in a collision that warrants airbag deployment, fragments could be propelled toward vehicle occupants, and the airbag assembly could be damaged, preventing proper function. These issues could increase the risk of injury. Correction: Dealers will replace the passenger frontal airbag inflator. Note: Canadian climate results in the propellant degrading slowly. The recall is being conducted as a precaution to address future risk, and is expected to replace airbag inflators before their function would be affected.

Engine

2013332 27 Sep 2013

On certain vehicles, the accelerator pedal throttle position sensor could fail. A faulty throttle position sensor will return the engine to idle. In certain cases, an abrupt return to idle could result in the engine stalling, causing a loss of motive power which, in conjunction with traffic and road conditions, and the driver's reactions, could increase the risk of a crash causing damage and/or personal injury. Correction: Dealers will replace the accelerator pedal throttle position sensor and reprogram the engine control module.

Listed for the model year, not checked against your VIN. Infiniti confirms which apply.

Check your VIN with Infiniti Canada or call a Infiniti dealer with your VIN.

| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 1 live listings, as of 28 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | |
| [3] NHTSA recall records (United States), listed for the model year | [5] Live public dealer listings on Cardog, as of 28 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
