cardog.app/tools/recalls/toyota/prius-v/2014

4 recalls listed by Transport Canada for this model year

Electrical

2020284 25 Jun 2020

Issue: The Intelligent Power Module (IPM), which is part of the hybrid drive system, could become damaged under certain driving conditions. This could cause various warnings to appear on the instrument panel and cause the hybrid system to shut down. If this happens, there can be a loss of power to the wheels. Safety Risk: A loss of power to the wheels could create the risk of a crash. Corrective Actions: Toyota will notify owners by mail and instruct you to take your vehicle to a dealer to update the software for the hybrid system.

Powertrain

2018546 5 Oct 2018

On certain vehicles, the Intelligent Power Module (IPM), which is part of the hybrid drive system, could become damaged under certain driving conditions. This could cause various warning lights to illuminate on the instrument panel of the vehicle and cause a reduction or loss of motive power, increasing the risk of a crash causing injury and/or property damage. Correction: Dealers will update motor/generator and hybrid control ECU software and affect repairs as necessary. Note: This recall supersedes recalls 2014-042 and 2015-312. Vehicles repaired under the previous recall(s) will require repair.

Powertrain

2015312 15 Jul 2015

On certain vehicles, the Intelligent Power Module (IPM), which is part of the hybrid system inverter assembly, could become damaged under certain driving conditions. This could cause various warning lights to illuminate in the instrument panel of the vehicle and cause a reduction or loss of motive power, increasing the risk of a crash causing injury and/or property damage. Correction: Dealers will update motor/generator and hybrid control ECU software and affect repairs as necessary. Note: This recall is superseded by recall 2018546. Please see recall 2018546 for more information.

Airbag

2015014 15 Jan 2015

Certain vehicles may not comply with the requirements of Canada Motor Vehicle Safety Standard (CMVSS) 208 – Occupant Protection. The passenger seat occupant classification system (OCS) may have been calibrated incorrectly during the manufacturing process. This could result in the non-deployment of an airbag, which would increase the risk of injury to the seat occupant in a crash where airbag deployment is warranted. Correction: Dealers will reprogram the occupant classification system (OCS).

Listed for the model year, not checked against your VIN. Toyota confirms which apply.
Check your VIN with Toyota Canada or call a Toyota dealer with your VIN.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 3 live listings, as of 27 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | |
| [3] NHTSA recall records (United States), listed for the model year | [5] Live public dealer listings on Cardog, as of 27 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
