## §2 OBLIGATIONS [2]

cardog.app/tools/recalls/toyota/venza/2022

1 recall listed by Transport Canada for this model year

**Brakes** 2022179 13 Apr 2022

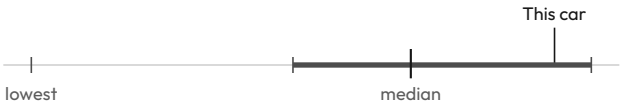

Issue: Under certain conditions, the vehicle stability control (VSC) system may not switch on when the ignition is restarted. This can happen if the driver manually turns off the VSC, depresses the brake pedal, and then turns off and restarts the vehicle while continuously depressing the brake pedal. Canadian regulations require the stability control system to be active each time that you start the vehicle. Safety Risk: A stability control system that is switched off could increase the risk of a crash. Corrective Actions: The company will notify owners by mail and instruct you to take your vehicle to a dealer to update the skid control ECU software.

> Listed for the model year, not checked against your VIN. Toyota confirms which apply.
> Check your VIN with Toyota Canada or call a Toyota dealer with your VIN.
> www.toyota.ca/en/owners/recalls/

United States: 1 NHTSA record for this model year, kept apart from the Canadian listing.[3]

### SOURCES

[1] Cardog identity register, decoded from the VIN
[2] Transport Canada recall database, listed for the model year
[3] NHTSA recall records (United States), listed for the model year
[4] Cardog market quote, same configuration, 11 live listings, as of 23 Nov 2026
[5] Live public dealer listings on Cardog, as of 23 Nov 2026

## STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
