§2 OBLIGATIONS ^[2]

cardog.app/tools/recalls/lexus/lx/2018

2 recalls listed by Transport Canada for this model year

Fuel system

2020514 28 Oct 2020

Issue: On certain vehicles, the low-pressure fuel pump could fail. If this happens, then engine may run rough or may not start and the check engine light may turn on. This could also result in a sudden loss of engine power while driving. Note: This recall is an expansion of recalls SRC R95/SRC R96 and SRC RA2/SRC RA3 (Transport Canada Recall Numbers 2020-005 and 2020-088). Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: The company will notify owners by mail and instruct you to take your vehicle to a dealer to replace the fuel pump.

Seats and restraints

2018706 13 Dec 2018

On certain vehicles, the seat belt tension sensor wiring of the front passenger occupant classification system could fatigue and break over time. This could result in the front passenger airbag, knee airbag, and passenger seat-mounted side airbag to become deactivated, which in the event of crash, could increase the risk of injury to the occupant. Correction: Dealers will modify or replace the front passenger seat belt assembly as necessary. Note: If the tension sensor wiring were to break it could cause the airbag warning light and the passenger airbag "OFF" indicator to illuminate.

Listed for the model year, not checked against your VIN. Lexus confirms which apply.

Check your VIN with Lexus Canada or call a Lexus dealer with your VIN.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
