2 recalls listed by Transport Canada for this model year

Steering

2017048 2 Feb 2017

On certain vehicles, melting snow and water containing road salt may enter the vehicle and corrode a splice connection in the electric power steering (EPS) module circuit. This could lead to increased resistance in the EPS circuit which could result in intermittent or permanent loss of the steering assist. A loss of power steering assist could unexpectedly increase steering effort which would increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will seal the affected connection and repair it as necessary.

Airbag

2015511 28 Oct 2015

On certain vehicles, corrosion in the driver and passenger airbag wiring harness connectors could cause a fault in the airbag sensing system. This could result in the airbag light illuminating on the instrument cluster and a "Service Air Bag" message to appear in the Driver Information Centre. Over time, the corrosion could reach a level where the front airbags and seatbelt pretensioners would not deploy in a crash. Failure of these components to deploy during a crash (where deployment is warranted) could increase the risk of injury. Correction: Dealers will repair the driver and passenger airbag wiring harness.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
