cardog.app/tools/recalls/hyundai/ioniq-5/2025

3 recalls listed by Transport Canada for this model year

Brakes

2025193 10 Apr 2025

Issue: On certain vehicles, the software update completed by a Hyundai dealer for recall R0277 (Transport Canada recall no. 2025-054) may not be effective. As a result, a second repair is required. On certain vehicles, a software problem in the integrated electronic brake could cause reduced braking when using the left-foot braking (LFB) feature. Additionally, a software problem in the vehicle control unit could cause the vehicle to continue to accelerate for a short period of time when using the N e-Shift feature. Note: This recall replaces recall R0277 (Transport Canada recall no. 2025-054). This recall only affects certain Ioniq 5 N models. Safety Risk: Reduced braking can cause extended stopping distances and increase the risk of a crash. A vehicle that continues to accelerate could create the risk of a crash. Corrective Actions: To reduce the safety risk, Hyundai recommends not to use the LFB or N e-SHIFT features until the recall repairs have been completed. Hyundai will notify owners by mail and advise you to take your vehicle to a dealership to update the integrated electronic brake and vehicle control unit software.

Brakes

2025054 6 Feb 2025

This recall was replaced by Transport Canada recall no. 2025-193. Issue: On certain vehicles, a software problem in the integrated electronic brake could cause reduced braking when using the left-foot braking (LFB) feature. Note: This recall only affects certain Ioniq 5 N models. Safety Risk: Reduced braking can cause extended stopping distances and increase the risk of a crash. Corrective Actions: To reduce the safety risk, Hyundai recommends not to use the LFB feature until the recall repairs have been completed. Hyundai will notify owners by mail and send a wireless over-the-air software update to eligible vehicles to update the integrated electronic brake and vehicle control unit software. Alternatively, you may schedule an appointment to have the update performed at a Hyundai dealership. Note: Potential complications have been reported with the corrective actions and, as a result, the recall campaign is currently suspended. Hyundai is investigating the root cause and will provide an update once available. For owners who have already had the recall repairs completed, it is advised NOT TO USE the N e-SHIFT feature.

Label

2024552 23 Sep 2024

Issue: On certain vehicles, the compliance label may be missing information in French. The words listed on the label for "Tires", "Rims", "Front" and "Rear" appear in English only, when they should be listed as "Tires/Pneus", "Rims/Jantes", "Front/Avant" and "Rear/Arriere". Canadian regulations require this information to be listed on the label in both English and French. Safety Risk: These small errors do not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the compliance label for all new vehicles.

Listed for the model year, not checked against your VIN. Hyundai confirms which apply.
Check your VIN with Hyundai Canada or call a Hyundai dealer with your VIN.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 5 live listings, as of 28 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | |
| [3] NHTSA recall records (United States), listed for the model year | [5] Live public dealer listings on Cardog, as of 28 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
