5 recalls listed by Transport Canada for this model year

Label 2024552 23 Sep 2024

Issue: On certain vehicles, the compliance label may be missing information in French. The words listed on the label for "Tires", "Rims", "Front" and "Rear" appear in English only, when they should be listed as "Tires/Pneus", "Rims/Jantes", "Front/Avant" and "Rear/Arriere". Canadian regulations require this information to be listed on the label in both English and French. Safety Risk: These small errors do not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the compliance label for all new vehicles.

Brakes 2024080 8 Feb 2024

Issue: On certain vehicles, brake fluid could leak into the control module for the antilock brake system (ABS) and cause it to short circuit. Note: This recall replaces recall R0246 (Transport Canada recall number 2023-527). For the Sonata model, only the Sonata Hybrid model is affected by this recall. Safety Risk: A short circuit could create a fire risk, even while the vehicle is parked and turned off. Corrective Actions: Hyundai will notify owners by mail and advise you to take your vehicle to a dealership to replace the fuse for the ABS module. Hyundai recommends that you should park your vehicle outdoors and away from other vehicles or structures until the recall repairs have been completed.

Brakes 2023527 22 Sep 2023

This recall was replaced by Transport Canada Recall No. 2024-080. Issue: On certain vehicles, brake fluid could leak into the control module for the antilock brake system (ABS) and cause it to short circuit. Safety Risk: A short circuit could create a fire risk, even while the vehicle is parked and turned off. Corrective Actions: Hyundai will notify owners by mail and advise you to take your vehicle to a dealership to replace the fuse for the ABS module. Hyundai recommends that you should park your vehicle outdoors and away from other vehicles or structures until the recall repairs have been completed.

Brakes

2023125 8 Mar 2023

Issue: Hyundai is conducting a special service campaign that provides anti-corrosion treatment to certain underbody components. Over time, components under the vehicle, including brake lines could corrode. If this happens, a brake line could fail and leak. A brake fluid leak can result in reduced braking. Safety Risk: Reduced braking can cause an extended stopping distance and increase the risk of a crash. Corrective Actions: Hyundai will notify owners by mail and advise you to take your vehicle to a dealership to inspect the underbody, including the brake lines. The dealer will apply an anti-corrosion treatment to certain parts, and replace the brake lines if necessary.

Structure

2017297 8 Jun 2017

On certain vehicles, the cable between the actuating lever for the secondary hood latch and the secondary latch may become corroded over time. This could cause the secondary hood latch to remain in the open position when the hood is closed. If the vehicle were to be driven with the primary hood latch disengaged, or primary hood latch is released while driving, the secondary hood latch may not hold the hood closed while the vehicle is in motion. If this were to occur, it could compromise the driver's ability to see the road and its users, as well as cause damage to the windshield. These issues could result in a crash causing injury and/or property damage. Correction: Dealers will replace the secondary hood latch cable.

Listed for the model year, not checked against your VIN. Hyundai confirms which apply.

Check your VIN with Hyundai Canada or call a Hyundai dealer with your VIN.

SOURCES

[1] Cardog identity register, decoded from the VIN

[2] Transport Canada recall database, listed for the model year

[3] NHTSA recall records (United States), listed for the model year

[4] Cardog market quote, same model year, 8 live listings, as of 28 Oct 2026

[5] Live public dealer listings on Cardog, as of 28 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
