**3** recalls listed by Transport Canada for this model year

### Steering

2017193 4 Apr 2017

On certain vehicles, a connection at the electric power steering (EPS) motor may have been damaged at time of assembly. This could lead to a loss of the steering assist. A loss of power steering assist could unexpectedly increase steering effort which would increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the EPS motor.

### Brakes

2017055 7 Feb 2017

On certain vehicles, the diaphragm in brake booster may unseat due to a manufacturing defect. This could result in a vacuum leak in the brake system and a reduction or loss in power brake assist, which would increase pedal effort, and extend stopping distances, which could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the vehicle brake system's booster assembly.

### Airbag

2016174 21 Apr 2016

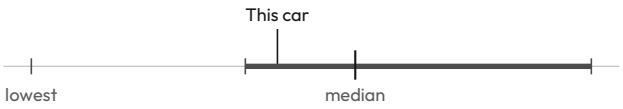

On certain vehicles, a manufacturing error could cause the second stage of the driver's frontal airbag to fail to deploy. This would increase the risk of injury to the driver in a crash severe enough to warrant the deployment of the airbag`s second stage. Correction: Dealers will replace the driver's frontal airbag module.
