4 recalls listed by Transport Canada for this model year

Brakes 2023125 8 Mar 2023

Issue: Hyundai is conducting a special service campaign that provides anti-corrosion treatment to certain underbody components. Over time, components under the vehicle, including brake lines could corrode. If this happens, a brake line could fail and leak. A brake fluid leak can result in reduced braking. Safety Risk: Reduced braking can cause an extended stopping distance and increase the risk of a crash. Corrective Actions: Hyundai will notify owners by mail and advise you to take your vehicle to a dealership to inspect the underbody, including the brake lines. The dealer will apply an anti-corrosion treatment to certain parts, and replace the brake lines if necessary.

Brakes 2014558 10 Dec 2014

On certain vehicles, a diode in the stop lamp circuit could fail, which could result in the brake lights failing to illuminate when the brake pedal is depressed, increasing the risk of a crash causing property damage and/or personal injury. Correction: Dealers will repair the stop lamp switch circuit.

Brakes 2013376 30 Oct 2013

On certain vehicles, corrosion could occur in the brake system Hydraulic Electronic Control Unit. Over time, this could affect the control unit's operation, causing a low/soft brake pedal and reduced braking effectiveness. This could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will affect repairs.

Electrical 2013325 25 Sep 2013

On certain vehicles, the stop lamp switch may fail and cause intermittent operation of the brake lights. Failure of the brake lights to illuminate when the brake pedal is depressed could result in a crash causing property damage and/or personal injury. Correction: Dealers will replace the switch.
