cardog.app/tools/recalls/hyundai/elantra/2023

4 recalls listed by Transport Canada for this model year

Other

2025636 17 Nov 2025

Issue : Hyundai Auto Canada is conducting an extended warranty campaign for certain vehicles as water could enter the horn assembly and cause the horn's electrical contacts to corrode. As a result, the horn may not work properly or at all. Safety risk: A horn that doesn't work properly could prevent a driver from warning others of a danger and create an unsafe situation. Corrective Actions: To reduce the safety risk, Hyundai advises you to test the horn regularly. Hyundai will notify owners in writing and advise you to contact a dealership if your horn doesn't work properly. Hyundai will provide an extended warranty of 10 years/200 000 km to replace the horn for free if it fails.

Fuel system

2024403 11 Jul 2024

Issue: On certain vehicles, the high-pressure fuel pump could fail. If this happens, the engine may run rough and the check engine light may turn on. This could also cause a sudden loss of engine power while driving. Note: For the Elantra, Kona and Veloster models, this recall only affects the N performance versions. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: Hyundai will notify owners by mail and advise you to take your vehicle to a dealership to update the engine control module software. The high-pressure fuel pump will be replaced, if necessary.

Powertrain

2023468 18 Aug 2023

Issue: On certain Elantra hybrid models, the vehicle could slowly accelerate after the brake pedal is released. Note: This problem can only happen under certain conditions after the vehicle enters "fail-safe" mode. Safety Risk: A vehicle that accelerates on its own could create the risk of a crash. Corrective Actions: Hyundai will notify owners by mail and advise you to take your vehicle to a dealership to update the motor control unit (MCU) software.

Powertrain

2023414 27 Jul 2023

Issue: On certain vehicles, the circuit board for the transmission electric oil pump may be damaged. As a result, the circuit board could short circuit and overheat, and various electrical systems may not work properly. Safety Risk: A short circuit could create the risk of a fire. Corrective Actions: Hyundai will notify owners by mail and advise you to take your vehicle to a dealership to inspect the transmission electric oil pump controller, and replace it as necessary. Hyundai recommends parking your vehicle outside and away from other vehicles or buildings until the recall repairs are completed.

Listed for the model year, not checked against your VIN. Hyundai confirms which apply.
Check your VIN with Hyundai Canada or call a Hyundai dealer with your VIN.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
