6 recalls listed by Transport Canada for this model year

Fuel system 2026185 9 Apr 2026

Issue: On certain vehicles, the nuts for the crossover fuel pipe may not have been properly tightened. As a result, fuel could leak. Safety Risk: A fuel leak can create the risk of a fire. Corrective Actions: Genesis will notify owners in writing and advise you to take your vehicle to a dealership to inspect and tighten the nuts or replace the crossover high-pressure fuel pipe, as necessary.

Seats and restraints 2026170 6 Apr 2026

Issue: On certain vehicles, the lower anchor for the front seat belt(s) may have been damaged during service. As a result, the seat belt(s) could detach in a crash. Note: For the 2026 model year Santa Fe, this recall only affects the Santa Fe hybrid (HEV) model. Safety Risk: A seat belt that detaches in a crash could increase the risk of injury. Corrective Actions: The company will notify owners in writing and advise you to take your vehicle to a dealership to inspect and reinforce the lower seat belt anchors. The seat belt assemblies will be replaced, as necessary.

Accessories 2025662 1 Dec 2025

Issue: Under certain conditions, the front corner radar could falsely detect another vehicle in its lane. If this happens, the vehicle could brake suddenly. Safety Risk: A vehicle that brakes suddenly when there is no risk of collision could increase the risk of a crash. Corrective Actions: To reduce the safety risk, Genesis advises not to use the highway driving assist (HDA) feature until the recall repairs have been completed. Genesis will notify owners in writing and advise you to take your vehicle to a dealership to replace the front bumper beam.

Lights and instruments

2025383 17 Jul 2025

Issue: On certain vehicles, a software problem could cause the instrument panel cluster display(s) not to display when the vehicle is started. As a result, you may not be able to see certain information about the vehicle, including the speedometer, fuel gauge, warning lights and malfunction tell-tales. Safety Risk: Warnings, tell-tales and gauges that don't display could increase the risk of a crash. Corrective Actions: Genesis will notify owners in writing and advise you to take your vehicle to a dealership to update the instrument panel cluster display software.

Fuel system

2024235 19 Apr 2024

Issue: On certain vehicles, the low-pressure fuel pump could fail when the outside temperature is high. If this happens, the engine may run rough or may not start. This could also result in a sudden loss of engine power while driving. Note: This recall replaces Transport Canada recall no. 2023-505. Vehicles that were repaired under that recall don't require this repair. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: Hyundai will notify owners by mail and advise you to take your vehicle to a dealership to replace the fuel pump.

Seats and restraints

2023176 28 Mar 2023

Issue: On certain vehicles, there may be a problem with the seat belt pretensioners. As a result, the seat belt pretensioners may not work properly in a crash. Safety Risk: A seat belt pretensioner that doesn't work properly could increase the risk of injury in a crash. Corrective Action: Genesis will notify owners by mail and instruct you to bring your vehicle to a dealership to install protective caps over the seat belt pretensioners.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
