2 recalls listed by Transport Canada for this model year

Engine

2024158 8 Mar 2024

Issue: Under certain conditions, the left turbocharger oil feed pipe and hose assembly could become damaged. If this happens, oil could leak onto hot components. Note: This recall only affects vehicles equipped with a 3.3 L turbo (T-GDI) engine. This recall replaces recall R0159 (Transport Canada recall number 2019-350). Vehicles that were repaired under that recall also require this repair. Safety Risk: Oil that leaks onto hot components can create the risk of a fire. Corrective Actions: Hyundai will notify owners by mail and advise you to take your vehicle to a dealership to replace the left turbocharger oil feed pipe and hose assembly.

Brakes

2021133 10 Mar 2021

Issue: On certain vehicles, a problem in the control module for the antilock brake system (ABS) could cause it to short circuit. Safety Risk: A short circuit could create a fire risk. Corrective Actions: Hyundai will notify owners by mail and advise you to take your vehicle to a dealer to replace the fuse for the ABS module. Hyundai recommends that you should park your vehicle outdoors and away from other vehicles or structures until the recall repairs have been completed.
