Body	Sport Utility Vehicle	Plant	Ulsan, South Korea

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/genesis/gv70/2025

4 recalls listed by Transport Canada for this model year

Fuel system

2026185 9 Apr 2026

Issue: On certain vehicles, the nuts for the crossover fuel pipe may not have been properly tightened. As a result, fuel could leak. Safety Risk: A fuel leak can create the risk of a fire. Corrective Actions: Genesis will notify owners in writing and advise you to take your vehicle to a dealership to inspect and tighten the nuts or replace the crossover high-pressure fuel pipe, as necessary.

Lights and instruments

2025091 19 Feb 2025

Issue: On certain vehicles, a software problem could cause the instrument panel cluster display(s) not to display properly, or at all when the vehicle is started. As a result, you may not be able to see certain information about the vehicle, including the speedometer, fuel gauge, warning lights and malfunction tell-tales. Note: For the GV70 model, this recall affects both the GV70 and Electrified GV70 (EV) models. Safety Risk: Warnings, tell-tales and gauges that don't display could increase the risk of a crash. Corrective Actions: Genesis will notify owners in writing and advise you to take your vehicle to a dealership to update the instrument panel cluster display software.

High voltage

2024701 18 Nov 2024

Issue: Over time, the integrated charging control unit (ICCU) could become damaged. As a result, the 12 V battery will not charge and could cause the vehicle to enter a reduced power mode. If this happens, and you continue to drive the vehicle, there could be a loss of power to the wheels. Note: This recall replaces Transport Canada recall no. 2024-174. Vehicles that were repaired under that recall also require this repair. This problem will cause a warning light to turn on and warning messages to display before any loss of power. For the Genesis GV70 and G80 models, only the electric versions (EV) are affected. Safety Risk: A loss of power to the wheels could increase the risk of a crash. Corrective Actions: Hyundai will notify owners by mail and advise you to take your vehicle to a dealership to update the vehicle software. The dealer will also inspect and, if necessary, replace the ICCU and ICCU fuse.

Label

2024552 23 Sep 2024

Issue: On certain vehicles, the compliance label may be missing information in French. The words listed on the label for "Tires", "Rims", "Front" and "Rear" appear in English only, when they should be listed as "Tires/Pneus", "Rims/Jantes", "Front/Avant" and "Rear/Arriere". Canadian regulations require this information to be listed on the label in both English and French. Safety Risk: These small errors do not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the compliance label for all new vehicles.

> Listed for the model year, not checked against your VIN. Genesis confirms which apply.

SOURCES

[1] Cardog identity register, decoded from the VIN
[2] Transport Canada recall database, listed for the model year
[3] NHTSA recall records (United States), listed for the model year
[4] Cardog market quote, same configuration, 39 live listings, as of 27 Oct 2026
[5] Live public dealer listings on Cardog, as of 27 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
