## 2

 recalls listed by Transport Canada for this model year

### Fuel system

2026185 9 Apr 2026

Issue: On certain vehicles, the nuts for the crossover fuel pipe may not have been properly tightened. As a result, fuel could leak. Safety Risk: A fuel leak can create the risk of a fire. Corrective Actions: Genesis will notify owners in writing and advise you to take your vehicle to a dealership to inspect and tighten the nuts or replace the crossover high-pressure fuel pipe, as necessary.

### Lights and instruments

2026008 15 Jan 2026

Issue: On certain vehicles, a software problem could cause the instrument panel cluster and audio/video/navigation displays to reboot while driving. As a result, you may not be able to see certain information about the vehicle, including the speedometer, fuel gauge, warning lights and malfunction tell-tales. Note: For the GV70 model, this recall affects both gas and EV (electric) models. Safety Risk: Warnings, tell-tales and gauges that don't display could increase the risk of a crash. Corrective Actions: To reduce the safety risk, Genesis advises you to disable the HD radio feature while driving until the recall repairs have been completed. Genesis will notify owners in writing and send a wireless over-the-air software update to eligible vehicles to update the audio/video/navigation software. Alternatively, you may schedule an appointment to have the update performed at a Genesis dealership.

Listed for the model year, not checked against your VIN. Genesis confirms which apply.
