3 recalls listed by Transport Canada for this model year

Brakes

2024163 12 Mar 2024

Issue: On certain vehicles, the inspection completed by a Kia dealer during service campaign SC044 (Transport Canada recall number 2022-222) may not have been done correctly. As a result, a second inspection is required. Over time, the brake lines under the vehicle could corrode. If this happens, a brake line could fail and leak. A brake fluid leak can result in reduced braking. Note: This service campaign replaces service campaign SC044 (Transport Canada recall number 2022-222). Vehicles that had brake lines replaced under that service campaign don't require this inspection. Safety Risk: Reduced braking can cause extended stopping distances and increase the risk of a crash. Corrective Actions: Kia will notify owners by mail and advise you to take your vehicle to a dealership to inspect the brake lines. The dealer will apply an anti-corrosion treatment and replace the brake lines, if required.

Brakes

2022222 2 May 2022

Issue: Over time, the brake lines under the vehicle could corrode. If this happens, a brake line could fail and leak. A brake fluid leak can result in reduced braking. Safety Risk: Reduced braking can cause extended stopping distances and increase the risk of a crash. Corrective Actions: Kia will notify owners by mail and advise you to take your vehicle to a dealership to inspect the brake lines. The dealer will apply an anti-corrosion treatment and replace the brake lines, if required.

Engine

2020597 4 Dec 2020

Issue: On certain vehicles equipped with a 2.0 L NU GDI or 2.4 L Theta II MPI engine, an engine compartment fire could occur while driving. Kia is conducting this recall as a preventative measure to prevent fire risk due to potential fuel leaks, oil leaks and/or engine damage. In some situations, you may notice any of the following symptoms: there could be an abnormal knocking noise from the engine; the check engine light and/or the oil pressure warning light could turn on; you may smell fuel, burning or smoke; or you may notice oil leaks. If you continue to drive the vehicle with these symptoms, the engine could fail and/or a fire could occur. An engine failure can cause a sudden loss of power with an inability to restart. Note: For the Optima model, only the Optima Hybrid is affected by this recall. Safety Risk: An engine compartment fire can create a risk of injury. A sudden loss of engine power could increase the risk of a crash. Corrective Action: Kia will notify owners by mail and instruct you to take your vehicle to a dealer for an inspection of the engine and engine compartment. The dealer will inspect for fuel and/or engine oil leaks, perform an engine test and make any repairs, including engine replacement, if necessary. Kia will also perform a Knock Sensor Detection System (KSDS) software update free of charge, once it is available for your vehicle. This update will detect and prevent engine damage from worn connecting rod bearings.

Listed for the model year, not checked against your VIN. Kia confirms which apply.

Check your VIN with Kia Canada or call a Kia dealer with your VIN.

SOURCES

- [1] Cardog identity register, decoded from the VIN
- [2] Transport Canada recall database, listed for the model year
- [3] NHTSA recall records (United States), listed for the model year
- [4] Cardog market quote, same configuration, 13 live listings, as of 29 Oct 2026
- [5] Live public dealer listings on Cardog, as of 29 Oct 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
