§2 OBLIGATIONS [2]

cardog.app/tools/recalls/kia/ev6/2023

4 recalls listed by Transport Canada for this model year

High voltage

2024700 18 Nov 2024

Issue: Over time, the integrated charging control unit (ICCU) could become damaged. As a result, the 12 V battery will not charge and could cause the vehicle to enter a reduced power mode. If this happens, and you continue to drive the vehicle, there could be a loss of power to the wheels. Note: This problem will cause a warning light to turn on and warning messages to display before any loss of power. This recall replaces Transport Canada recall no. 2024-173. Vehicles that were repaired under that recall also require this repair. Safety Risk: A loss of power to the wheels could increase the risk of a crash. Corrective Actions: Kia will notify owners by mail and advise you to take your vehicle to a dealership to update the vehicle software. The dealer will also inspect and, if necessary, replace the ICCU and ICCU fuse.

Label

2024549 15 Aug 2024

Issue: On certain vehicles, the compliance label may be missing information in French. The words listed on the label for "Tires", "Rims", "Front" and "Rear" appear in English only, when they should be listed as "Tires/Pneus", "Rims/Jantes", "Front/Avant" and "Rear/Arriere". Canadian regulations require this information to be listed on the label in both English and French. Safety Risk: These small errors do not affect vehicle safety. Corrective Actions: This is not a recall. Kia has corrected the compliance label for all new vehicles.

High voltage

2024173 15 Mar 2024

This recall was replaced by Transport Canada recall no. 2024-700. Issue: Over time, the integrated charging control unit (ICCU) could become damaged. As a result, the 12 V battery will not charge and could cause the vehicle to enter a reduced power mode. If this happens, and you continue to drive the vehicle, there could be a loss of power to the wheels. Note: This problem will cause a warning light to turn on and warning messages to display before any loss of power. Safety Risk: A loss of power to the wheels could increase the risk of a crash. Corrective Actions: Kia will notify owners by mail and advise you to take your vehicle to a dealership to update the vehicle software. The dealer will also inspect and, if necessary, replace the ICCU and ICCU fuse.

Powertrain 2024054 31 Jan 2024

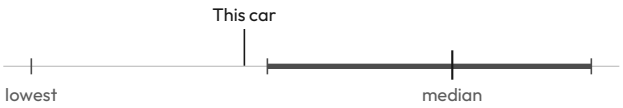

Issue: On certain electric vehicles, an axle shaft may not have been manufactured properly. As a result, the axle shaft could break and cause a loss of power to the wheels. Note: For the Niro EV model, the left-front axle shaft is affected. For the EV6 model, the inner-rear axle shaft is affected. Safety Risk: A loss of power to the wheels could increase the risk of a crash. Corrective Actions: Kia will notify owners by mail and advise you to take your vehicle to a dealership to replace the axle shaft.

Listed for the model year, not checked against your VIN. Kia confirms which apply.
Check your VIN with Kia Canada or call a Kia dealer with your VIN.

SOURCES

[1] Cardog identity register, decoded from the VIN

[2] Transport Canada recall database, listed for the model year

[3] NHTSA recall records (United States), listed for the model year

[4] Cardog market quote, same model year, 27 live listings, as of 26 Nov 2026

[5] Live public dealer listings on Cardog, as of 26 Nov 2026

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
