**2** recalls listed by Transport Canada for this model year

### Label

2024549 15 Aug 2024

Issue: On certain vehicles, the compliance label may be missing information in French. The words listed on the label for "Tires", "Rims", "Front" and "Rear" appear in English only, when they should be listed as "Tires/Pneus", "Rims/Jantes", "Front/Avant" and "Rear/Arriere". Canadian regulations require this information to be listed on the label in both English and French. Safety Risk: These small errors do not affect vehicle safety. Corrective Actions: This is not a recall. Kia has corrected the compliance label for all new vehicles.

### Engine

2021225 14 Apr 2021

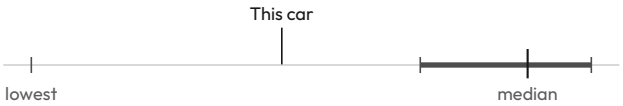

Issue: On certain vehicles, the engine's piston oil rings may be defective. This can cause engine wear that can lead to increased oil consumption. Eventually, this can create abnormal engine noise and the oil pressure warning light may turn on. If you continue to drive the vehicle with these symptoms, the engine could fail. Note: This only affects vehicles equipped with a 2.0 L Nu MPI engine. Safety Risk: A sudden loss of engine power could increase the risk of a crash. An engine failure could also create the risk of a fire. Corrective Actions: Kia will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the engine. The engine will be replaced, if necessary. The dealer will also install a Piston-ring Noise Sensing System (PNSS) software update, to alert the driver of potential damage before an engine failure occurs.
