7

 recalls listed by Transport Canada for this model year

Label	2024549	15 Aug 2024
Issue: On certain vehicles, the compliance label may be missing information in French. The words listed on the label for "Tires", "Rims", "Front" and "Rear" appear in English only, when they should be listed as "Tires/Pneus", "Rims/Jantes", "Front/Avant" and "Rear/Arriere". Canadian regulations require this information to be listed on the label in both English and French. Safety Risk: These small errors do not affect vehicle safety. Corrective Actions: This is not a recall. Kia has corrected the compliance label for all new vehicles.		
Fuel system	2020075	26 Feb 2020
Issue: On certain vehicles, the fuel rail could develop small cracks. If this happens, there could be a fuel odour or fuel leak in the engine compartment. Safety Risk: A fuel leak can create the risk of a fire. Corrective Actions: Kia will notify owners by mail and instruct you to take your vehicle to a dealer to replace the fuel rail.		
Airbag	2018301	8 Jun 2018
On certain gasoline and hybrid engine vehicles, the circuits within the airbag control unit may become damaged. This could cause the airbags and seat belt pretensioners to not deploy in certain collisions where deployment is warranted, which could increase the risk of injury to vehicle occupants. Correction: Dealers will install a wire harness kit between the ACU connector and vehicle harness connector as necessary. Note: This recall does not affect the 2013 model year Optima Hybrid.		

Structure

2016274 2 Jun 2016

On certain vehicles, the secondary hood latch could corrode, and may result in the mechanical binding of the latch. This could cause the secondary hood latch to remain in the open position when the hood is closed. If the vehicle were to be driven with the primary hood latch disengaged, there is a potential that the secondary hood latch may not hold the hood closed as designed while the vehicle is in motion. If this were to occur, it could compromise the driver's ability to see the road and its users, as well as cause damage to the windshield. These issues could result in a crash causing injury and/or property damage. Correction: Dealers will replace the secondary latch with an improved secondary latch with an enhanced corrosion coating.

Suspension

2016273 2 Jun 2016

On certain vehicles, road salt can corrode the front control arms, which may ultimately lead to control arm failure. This could result in a loss of vehicle control, increasing the risk of a crash causing injury and/or property damage. Correction: For 2006–2007 model year vehicles, dealers will replace the front lower control arms if they were not previously replaced under recall 2013-388. For 2008–2012 model year vehicles, dealers will inspect the control arms and either apply an anticorrosion treatment or replace the control arms, as necessary. Note: This recall supersedes recall 2013-388.

Suspension

2013388 6 Nov 2013

On certain vehicles, road salt can corrode the front control arms, which may ultimately lead to control arm failure. This could result in a loss of vehicle control, increasing the risk of a crash causing injury and/or property damage. Correction: Dealers will inspect the control arms and either apply an anticorrosion treatment or replace control arms, as necessary.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
