3 recalls listed by Transport Canada for this model year

Label 2024549 15 Aug 2024

Issue: On certain vehicles, the compliance label may be missing information in French. The words listed on the label for "Tires", "Rims", "Front" and "Rear" appear in English only, when they should be listed as "Tires/Pneus", "Rims/Jantes", "Front/Avant" and "Rear/Arriere". Canadian regulations require this information to be listed on the label in both English and French. Safety Risk: These small errors do not affect vehicle safety. Corrective Actions: This is not a recall. Kia has corrected the compliance label for all new vehicles.

Electrical 2021123 8 Mar 2021

Issue: On certain vehicles, a problem in the control module for the antilock brake system (ABS) could cause it to short circuit. Note: This recall does not affect vehicles equipped with Smart Cruise Control (SCC). Safety Risk: A short circuit could create a fire risk. Corrective Actions: Kia will notify owners by mail and advise you to take your vehicle to a dealer to install new ABS fuse(s) and, on certain models, update the Hydraulic Electronic Control Unit (HECU) software. Kia recommends that you should park your vehicle outdoors and away from other vehicles or structures until the recall repairs have been completed.

Engine 2019639 17 Dec 2019

Issue: Kia Canada is conducting a Product Improvement Campaign that provides an update to the engine control module to detect potential problems before an engine fails. An engine failure may cause a sudden loss of power with an inability to restart. Safety Risk: A sudden loss of engine power could increase the risk of a crash. Corrective Actions: The company will notify owners by mail. Owners will be instructed to take their vehicle to a dealer to update the software for the engine control module.
