2 recalls listed by Transport Canada for this model year

Brakes

2021137 11 Mar 2021

Issue: Under certain conditions, the antilock brake system (ABS) and the dynamic stability control (DSC) may be disabled when you start the vehicle. If this happens, the ABS and DSC warning lights will turn on in the instrument cluster, along with message center text to alert the driver. Safety Risk: If the stability control system and antilock brake system are disabled, there could be an increased risk of a crash. Corrective Actions: Jaguar will notify owners by mail and instruct you to take your vehicle to a dealer to update the vehicle with the latest software.

Label

2019472 26 Sep 2019

Issue: On certain cars fitted with 18-inch rear tires, the tire placard label shows the wrong rear tire size. Canadian regulations require the correct tire size to be listed on the tire placard. If the car is fitted with the incorrect rear tires, it may not handle as designed. Safety Risk: A change in vehicle handling characteristics could increase the risk of a crash. Corrective Action: The company will notify owners by mail and instruct them to take their car to a dealer to install a corrected tire placard label.
