2 recalls listed by Transport Canada for this model year

Fuel system 2006283 30 Oct 2006

On certain vehicles, the Fuel Delivery Module (FDM), Jet Pump Module (JPM) and/or Cluster Valve (CV) seals are not properly retained in the fuel tank. This may result in illumination of the Malfunction Indicator Lamp (MIL) or a fuel odour. If the amount of fuel is above the FDM, JPM or CV apertures, fuel may be discharged onto the ground. A fuel leak in the presence of an ignition source may result in a fire. Correction: Dealers will replace the fuel tank or change the seals.

Label 2004398 15 Nov 2004

Certain vehicles do not comply with the requirements of CMVSS 135. The brake fluid master cylinder reservoir is recessed and oriented in the engine compartment beneath a leaf screen, such that the brake fluid warning statement embossed on the top of the reservoir body is not visible by direct view. Correction: Jaguar will mail letters to all registered owners which will include labels containing the required warning statement and installation instructions.

Listed for the model year, not checked against your VIN. Jaguar confirms which apply.
