2 recalls listed by Transport Canada for this model year

Electrical 2013268 2 Aug 2013

Certain vehicles equipped with a convertible roof fail to conform to Canada Motor Vehicle Safety Standard 118 – Power-Operated Window, Partition and Roof Panel Systems. The overhead switch (which operates the convertible roof and the power windows) does not operate in the manner prescribed by the Standard. This could result in inadvertent power window activation, which could cause injury if a body part becomes trapped by a closing window. Correction: Dealers will replace the overhead roof console assembly with an updated version.

Fuel system 2010237 21 Jul 2010

On certain vehicles equipped with a 5.0L engine, the in-tank electric fuel pump may not be correctly activated following a vehicle start-up cycle. The engine may start and continue to operate as normal until the engine fuel demand exceeds the ability for the pump to supply sufficient fuel. The engine can then cut out without warning. Loss of propulsion, in conjunction with traffic and road conditions, and the driver's reactions, could increase the risk of a crash causing property damage and/or personal injury. Correction: Dealers will reprogram the Engine Control Module.
