4 recalls listed by Transport Canada for this model year

Seats and restraints

2019202 25 Apr 2019

Issue: On certain cars, the occupant classification system (OCS) may not work properly. This could cause the airbag system not to turn off the airbag when an infant or child is seated in the passenger seat. Note: Cars that had repairs completed under Jaguar recall J047 (Transport Canada recall 2014-515) require a second inspection for this recall. Safety Risk: In a crash, an airbag that deploys in front of an infant or child increases the risk of injury. Corrective Actions: The company will notify owners by mail and instruct them to take their car to a dealer to inspect the passenger seat belt assembly. The seat belt wiring will be repaired as required. Note: Children should not be transported in passenger seat until this recall is completed.

Airbag

2014515 12 Nov 2014

On certain vehicles, a defect in the occupant classification system wiring could cause the system to fail to detect a child or small stature adult seated in the front passenger seating position, instead detecting an unoccupied seat and disabling the passenger airbag. The defect could also cause the system to fail to detect a child car seat installed in the passenger seat and not disable the passenger airbag. This could increase the risk of injury to the seat occupant in a crash. Correction: Dealers will correct the wiring harness configuration.

Engine

2014486 30 Oct 2014

On certain vehicles, fasteners securing components of the engine accessory belt drive system may not have been tightened to specification, and could become loose. This could cause a loss of power steering and/or electrical charging system function, and could allow the alternator's positive cable to arc against other components, potentially resulting in a fire. These issues could increase the risk of injury and/or damage to property. Correction: Dealers will inspect fasteners to and tighten to specification as necessary.

Accessories

2014329 6 Aug 2014

On certain vehicles, a programming feature which limits vehicle speed in the event of a deployable rear spoiler fault may not function as intended. This could allow the vehicle to be operated at higher speeds without the spoiler being in the deployed position, which could affect vehicle handling and increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will update vehicle software.

Listed for the model year, not checked against your VIN. Jaguar confirms which apply.

Check your VIN with Jaguar Canada or call a Jaguar dealer with your VIN.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 2 live listings, as of 26 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | |
| [3] NHTSA recall records (United States), listed for the model year | [5] Live public dealer listings on Cardog, as of 26 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
