Make	Jaguar	Fuel	Gasoline
Model	XF	Drive	AWD
Trim	Sport & Portfolio	Maker	JAGUAR LAND ROVER LIMITED
Body	Sedan	Plant	Castle Bromwich, United Kingdom

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/jaguar/xf/2015

4 recalls listed by Transport Canada for this model year

Airbag 2018009 8 Jan 2018

On certain vehicles, long-term exposure to high absolute humidity and temperature, combined with high temperature cycling, could eventually degrade the propellant contained in the passenger frontal airbag. This could cause the airbag to deploy with more force than normal. As a result, if the vehicle were involved in a collision that warrants airbag deployment, fragments could be propelled toward vehicle occupants, and the airbag assembly could be damaged, preventing proper function. These issues could increase the risk of injury. Correction: Dealers will replace the passenger frontal airbag module. Note: Canadian climate results in the propellant degrading slowly. The recall is being conducted as a precaution to address future risk, and is expected to replace the passenger frontal airbag module before their function would be affected.

Fuel system 2016532 27 Oct 2016

On certain vehicles, the fuel delivery line may not have sufficient clearance between the underfloor and the under shield. This could cause the fuel line to chafe against the underfloor and the under shield which could result in a fuel leak. A fuel leak in the presence of an ignition source could result in a fire causing injury and/or damage to property. Correction: Dealers will inspect the fuel delivery line for chaffing and replace it as necessary. Additional clips will be added to prevent chafing.

Steering 2016105 3 Mar 2016

On certain vehicles equipped with the 2.0L GTDI engine, a bolt retaining a Front End Auxiliary Drive (FEAD) idler pulley may fail. This could cause the hydraulic power assisted steering system to stop functioning which would unexpectedly increase the steering effort force necessary to steer the vehicle, increasing the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the FEAD pulley assembly with an updated version.

Engine

2014486 30 Oct 2014

On certain vehicles, fasteners securing components of the engine accessory belt drive system may not have been tightened to specification, and could become loose. This could cause a loss of power steering and/or electrical charging system function, and could allow the alternator's positive cable to arc against other components, potentially resulting in a fire. These issues could increase the risk of injury and/or damage to property.
Correction: Dealers will inspect fasteners to and tighten to specification as necessary.

Listed for the model year, not checked against your VIN. Jaguar confirms which apply.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 2 live listings, as of 27 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | |
| [3] NHTSA recall records (United States), listed for the model year | [5] Live public dealer listings on Cardog, as of 27 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
