2 recalls listed by Transport Canada for this model year

Brakes

2015168 17 Apr 2015

On certain vehicles equipped with a front center console cooled cubby box, a defect may exist in the antilock braking system, which could cause a fault to be registered in the system upon vehicle shutdown. This would cause the Dynamic Stability Control (DSC) warning light to be illuminated when the vehicle is restarted, and disable the DSC, traction control and hill descent control systems. The fault would also cause the air suspension to revert to its lowest setting, displaying a "Suspension Fault" warning on the instrument panel. These issues could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will update vehicle software.

Wheels

2015076 19 Feb 2015

On certain vehicles, the wheel nuts may contain a manufacturing defect. The wheel nuts may crack and detach from the wheel hub stud when subjected to shock loading. Correction: Dealers will replace wheel nuts. Locking wheel nuts are not affected by this concern.

Listed for the model year, not checked against your VIN. Land Rover confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
