1 recall listed by Transport Canada for this model year

Certain vehicles equipped with a sunroof may experience failure of either the left or right-hand side sunroof guide rails when the sunroof is operated. This could cause the sunroof to bind, twist, or detach from the operating mechanism. If the sunroof is subsequently cycled and a vertical force applied (for example, customer manually aiding roof to close) the glass panel can become fully detached from the vehicle, which could impact nearby persons or objects, resulting in personal injury and/or vehicle and property damage. Correction: Dealers will install retention inserts to both side of the glass panel guide rails.

Listed for the model year, not checked against your VIN. Land Rover confirms which apply.
