3 recalls listed by Transport Canada for this model year

Visual system

2024017 18 Jan 2024

For Ranger Rover Sport models, this recall was replaced by Transport Canada recall no. 2024-289. Issue: On certain vehicles, water could leak into the rearview camera and cause the rearview camera image not to display correctly. Note: This recall only affects vehicles equipped with a surround camera system. Safety Risk: A rearview camera image that doesn't display correctly could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Land Rover will notify owners by mail and advise you to take your vehicle to a dealership to inspect the rearview camera and install a new seal. The dealer will replace the rearview camera, if necessary.

Lights and instruments

2021102 25 Feb 2021

Issue: On certain vehicles, when the Automatic High Beam (AHB) system is turned on, the AHB tell-tale indicator on the instrument panel may not turn on. This could lead you to drive without knowing that high beam lights can turn on automatically. Canadian regulations require a tell-tale indicator to turn on when the automatic high beams are activated. Safety Risk: A driver that does not know that the high beam lights are turned on could create glare for other drivers and increase the risk of a crash. Corrective Actions: Land Rover will notify owners by mail and instruct you to take your vehicle to a dealer to update vehicle software.

Brakes

2018499 13 Sep 2018

On certain vehicles, the Autonomous Emergency Braking (AEB) system is inoperative with no warning to the driver. In the event of a potential collision, the AEB would not activate as intended, which could increase the risk of injury and/or damage to property. Correction: Dealers will update the AEB software.
