On certain vehicles, the backrest of the manual reclining second row seat system may not latch properly. On certain vehicles, if doors fail to latch properly in the primary or secondary closed position, there would be no indication provided to vehicle occupants of the unlatched door condition. This could result in a door opening while the vehicle is in motion, which could increase the risk of injury to a vehicle occupant seated next to the door, or result in damage to property. Correction: Dealers will update the vehicle software.
