1 recall listed by Transport Canada for this model year

Engine 2023396 17 Jul 2023

Issue: Under certain conditions, the joint between the engine coolant temperature sensor housing and coolant pipe could fail. If this happens, coolant could leak while driving. Safety Risk: A coolant leak could lead to a fire in the engine bay. Corrective Action: McLaren will notify owners by mail and advise you to bring your vehicle to a dealership to replace the engine coolant temperature sensor housing and hose. McLaren recommends not to drive your vehicle on a racetrack until the recall repairs have been completed.

Listed for the model year, not checked against your VIN. McLaren confirms which apply.
