4 recalls listed by Transport Canada for this model year

Structure	2016368	21 Jul 2016
On certain vehicles, the glass panel of the sunroof may not have been properly bonded to the sunroof frame. This could allow the glass panel to separate from the vehicle while driving, creating a road hazard which could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will apply additional adhesive between the sunroof frame and glass panel.		
Brakes	2013338	1 Oct 2013
On certain vehicles equipped with carbon ceramic brakes, the brake rotor fixing screws may fail. This could result in reduced braking performance, which could increase stopping distances and increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the screws with an updated design.		
Lights and instruments	2013076	12 Mar 2013
Certain vehicles do not comply with the requirements Canada Motor Vehicle Safety Standard 108 - Lighting System and Retroreflective Devices. The Daytime Running Lights (DRL) system does not meet requirements of the standard when the sidelights are manually selected on the headlamp switch. Correction: Dealers will modify the DRL system.		
Fuel system	2008173	20 May 2008
On certain vehicles, the outer surface of the fuel filter may corrode prematurely. This may cause the filter housing to become porous and develop a leak. Fuel leakage in the presence of an ignition source could result in a vehicle fire, possibly causing personal injury or death. Correction: Dealers will replace the fuel filter and reposition the retaining clip.
