cardog.app/tools/recalls/aston-martin/db9/2014

4 recalls listed by Transport Canada for this model year

Powertrain	2017639	18 Dec 2017
On certain vehicles equipped with the 6-speed Touchtronic II automatic transmission, the Engine Control Module software may not communicate correctly with the Transmission Control Module when the key is removed from the docking station. If this occurs, the transmission park pawl may not engage properly, which could result in unintended vehicle movement, increasing the risk of injury and/or property damage. Correction: Dealers will update the Transmission Control Module software.		
Other	2016374	26 Jul 2016
Certain vehicles fail to conform to Canada Motor Vehicle Safety Standard 206 – Door Lock and Door Retention Components. These vehicles have a double locking feature that will not let the doors be opened by an occupant inside the vehicle unless the unlock button is pressed on the vehicle key. As a result, occupants may be at a greater risk of being locked in the vehicle in an emergency situation. Correction: Dealers will update the vehicle's software to disable the double locking feature.		
Electrical	2014543	3 Dec 2014
On certain vehicles, a defect in the seat heater wiring could cause the front seat heaters to remain on even when the control switch is in the "off" position. This could cause certain areas of the seats to overheat, which could result in injury to seat occupants and increase the risk of a fire causing damage to property. Correction: Dealers will install an additional module which will isolate power supply in the event of a malfunction.		
Powertrain	2014313	23 Jul 2014
On certain vehicles, a defect in the transmission control switch could cause the transmission to shift to the neutral gear position without driver input, resulting in a loss of motive power. This could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace affected transmission control switches.		

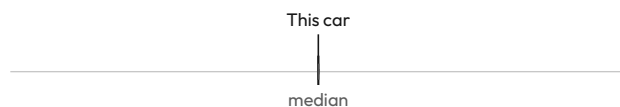

Listed for the model year, not checked against your VIN. Aston Martin confirms which apply.

SOURCES

[1] Cardog identity register, decoded from the VIN	[4] Cardog market quote, same model year, 1 live listings, as of 27 Oct 2026
[2] Transport Canada recall database, listed for the model year	[5] Live public dealer listings on Cardog, as of 27 Oct 2026
[3] NHTSA recall records (United States), listed for the model year	

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
