2 recalls listed by Transport Canada for this model year

Structure 2026364 24 Jul 2026

Issue: On certain vehicles, moisture could enter the driver-side door lock microswitch and cause it to corrode. As a result, the microswitch may fail to automatically engage the parking brake and/or the auto park feature when the door is opened. If this happens, the vehicle could roll away.

Note: This problem could also cause the radio and/or interior lights to remain on after exiting the vehicle. Safety Risk: A parked vehicle that rolls away could create the risk of an injury or a crash. Corrective Actions: To reduce the safety risk, Mercedes-Benz recommends that you should always use the parking brake when you park. Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to replace the driver-side door lock.

Seats and restraints 2025119 7 Mar 2025

Issue: On one vehicle, the rear passenger seat rails may not have been manufactured properly. As a result, the seats could move in a crash.

Safety Risk: A seat that moves in a crash could create an increased risk of injury. Corrective Actions: Mercedes-Benz will notify the owner by mail and advise them to take their vehicle to a dealership to inspect and, if necessary, replace the rear seat structure for the rear seats.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
