5 recalls listed by Transport Canada for this model year

High voltage 2026052 9 Feb 2026

Issue: On certain vehicles, the recall repairs completed by a Mercedes-Benz dealer during Transport Canada recall nos. 2025-041 or 2025-527 may not be effective. As a result, another repair is required. On certain vehicles, there could be a problem inside the high-voltage battery. As a result, the battery modules could overheat and short circuit. Safety Risk: A short circuit in the high-voltage battery can create a fire risk, even while the vehicle is parked and turned off. Corrective Actions: To reduce the safety risk, Mercedes-Benz recommends that you set the maximum charge setting of your vehicle at 80% and that you should park your vehicle outdoors and away from other vehicles or structures until the recall repairs are completed. Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to replace the high-voltage battery.

High voltage 2025700 18 Dec 2025

Issue: On one vehicle, the recall repairs completed by a Mercedes-Benz dealer during recall 5496507 (Transport Canada recall no. 2025-527) may not have been done correctly. As a result, a second repair is required. On certain vehicles, there could be a problem inside the high-voltage battery. As a result, the battery modules could overheat and short circuit. Safety Risk: A short circuit in the high-voltage battery can create a fire risk. Corrective Actions: To reduce the safety risk, Mercedes-Benz recommends that you set the maximum charge setting of your vehicle at 80% until the recall repairs are completed. Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to update the battery management system software.

High voltage

2025527 2 Oct 2025

Issue: On certain vehicles, there could be a problem inside the high-voltage battery. As a result, the battery modules could overheat and short circuit. Note: This recall replaces Transport Canada recall no. 2025-041. Vehicles that were repaired under that recall don't require this repair. Safety Risk: A short circuit in the high-voltage battery can create a fire risk. Corrective Actions: To reduce the safety risk, Mercedes-Benz recommends that you set the maximum charge setting of your vehicle at 80% until the recall repairs are completed. Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to update the battery management system software.

High voltage

2025391 25 Jul 2025

Issue: On certain vehicles, a connection in the high-voltage battery may not have been tightened properly. As a result, there could be a loss of power to the wheels. Safety Risk: A sudden loss of power to the wheels could increase the risk of a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the high-voltage battery.

High voltage

2025041 31 Jan 2025

This recall was replaced by Transport Canada recall no. 2025-527. Issue: On certain vehicles, there could be a problem inside the high-voltage battery. As a result, the battery modules could overheat and short circuit. Safety Risk: A short circuit in the high-voltage battery can create a fire risk. Corrective Actions: To reduce the safety risk, Mercedes-Benz recommends that you set the maximum charge setting of your vehicle at 80% until the recall repairs are completed. Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to update the battery management system software.

Listed for the model year, not checked against your VIN. Mercedes-Benz confirms which apply.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [3] Cardog market quote, same model year, 2 live listings, as of 28 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [4] Live public dealer listings on Cardog, as of 28 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
