2 recalls listed by Transport Canada for this model year

Powertrain

2025076 14 Feb 2025

Issue: On certain electric vehicles, the drive gear in the rear axle drivetrain may not have been properly welded. As a result, the weld for the drive gear could break and cause a loss of power to the wheels. Additionally, the vehicle could move when it's parked and the parking brake isn't applied. Note: This recall only affects certain eSprinter models. Safety Risk: A loss of power to the wheels or a parked vehicle that moves suddenly could create the risk of an injury and/or a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to replace the rear axle electric drivetrain.

Brakes

2024261 7 May 2024

Issue: On certain electric vehicles, a software problem could cause the brake booster failsafe mode not to work properly. As a result, there could be a sudden increase in brake pedal force, if a fault is detected. Safety Risk: A sudden increase in brake pedal force can cause extended stopping distances and increase the risk of a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to update the electronic stability control unit software.

Listed for the model year, not checked against your VIN. Mercedes-Benz confirms which apply.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
