§2 OBLIGATIONS [2]

cardog.app/tools/recalls/audi/q8/2024

4 recalls listed by Transport Canada for this model year

Brakes 2026187 15 Apr 2026

Issue: On certain vehicles, the brake booster input rod may not have been tightened properly. As a result, the input rod could detach from the brake booster and cause a loss of brakes. Note: This recall is an expansion of Transport Canada recall no. 2024-670. For 2020-2024 model years, this recall affects both Sportback and SUV models. Safety Risk: A loss of brakes can increase the risk of a crash. Corrective Actions: Audi will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, tighten the brake booster input rod screw joint.

Visual system 2025713 19 Dec 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to appear on the display. Canadian regulations require the rearview image to display when the transmission is shifted into reverse gear. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Audi will notify owners by mail and advise you to take your vehicle to a dealership to update the rearview camera software.

Brakes 2024332 10 Jun 2024

Issue: On a small number of vehicles, connections on the brake pressure lines may have been over-tightened. As a result, brake fluid could leak and cause reduced braking. If this happens, you may experience a change in brake pedal feel and travel. Note: This problem could cause a "Brake fluid level low" warning message to display. Safety Risk: Reduced braking can cause increased stopping distances and create the risk of a crash. Corrective Actions: Audi will notify owners by mail and advise you to take your vehicle to a dealership to inspect the connections on the brake pressure lines and, if necessary, replace the affected brake pressure lines.

Airbag

2023685 20 Dec 2023

Issue: On certain vehicles, the driver seat-mounted airbag may not have been installed properly. As a result, the airbag may not inflate properly in a crash. Safety Risk: A seat-mounted airbag that doesn't work properly could increase the risk of injury in a crash. Corrective Actions: Audi will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, reinstall the driver seat-mounted airbag.

Listed for the model year, not checked against your VIN. Audi confirms which apply.

Check your VIN with Audi Canada or call a Audi dealer with your VIN.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 9 live listings, as of 27 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | |
| [3] NHTSA recall records (United States), listed for the model year | [5] Live public dealer listings on Cardog, as of 27 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
