1 recall listed by Transport Canada for this model year

Steering

2015315 17 Jul 2015

On certain vehicles, during cold ambient temperatures, the electric power steering assist system may shut down as a result of a steering motor sensor fault. This would unexpectedly increase the steering effort force necessary to steer the vehicle at lower vehicle speeds, which could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will update the power steering control module software.

Listed for the model year, not checked against your VIN. Audi confirms which apply.
