2 recalls listed by Transport Canada for this model year

Steering

2020102 16 Mar 2020

Issue: On certain vehicles, the bolt that attaches the steering shaft to the steering gear may not be properly tightened. Over time, the bolt may loosen. If you continue to operate the vehicle, the bolt could detach completely and cause a loss of steering control. Safety Risk: A loss of steering could create the risk of a crash. Corrective Actions: Audi will notify owners by mail and instruct you to take your vehicle to a dealer to inspect the steering shaft bolt and, if necessary, replace it.

Suspension

2019076 20 Feb 2019

Issue: On certain vehicles, the front shock absorber forks may crack. This may allow the shock absorber to come loose and cause the tire to contact the wheel housing. This could affect steering control. Safety Risk: If the steering system does not work properly, there could be an increased risk of a crash. Corrective Actions: The company will notify owners by mail. Owners will be instructed to take their vehicle to a dealer to have the affected shock absorber fork(s) replaced.
