Body	Sport Utility Vehicle	Plant	Brussels, Belgium

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/audi/e-tron/2019

6 recalls listed by Transport Canada for this model year

Brakes

2026187 15 Apr 2026

Issue: On certain vehicles, the brake booster input rod may not have been tightened properly. As a result, the input rod could detach from the brake booster and cause a loss of brakes. Note: This recall is an expansion of Transport Canada recall no. 2024-670. For 2020-2024 model years, this recall affects both Sportback and SUV models. Safety Risk: A loss of brakes can increase the risk of a crash. Corrective Actions: Audi will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, tighten the brake booster input rod screw joint.

Visual system

2025713 19 Dec 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to appear on the display. Canadian regulations require the rearview image to display when the transmission is shifted into reverse gear. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Audi will notify owners by mail and advise you to take your vehicle to a dealership to update the rearview camera software.

Brakes

2024670 4 Nov 2024

Issue: On certain vehicles, the brake booster input rod may not have been tightened properly. As a result, the input rod could detach from the brake booster and cause a loss of brakes. Note: This recall replaces Transport Canada recall no. 2024-484. Vehicles that were repaired under that recall don't require this repair. Safety Risk: A loss of brakes can increase the risk of a crash. Corrective Actions: Audi will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, tighten the brake booster input rod screw joint.

Brakes

2024484 19 Aug 2024

This recall was replaced by Transport Canada recall no. 2024-670. Issue: On certain vehicles, the brake booster input rod may not have been tightened properly. As a result, the input rod could detach from the brake booster and cause a loss of brakes. Safety Risk: A loss of brakes can increase the risk of a crash. Corrective Actions: Audi will notify owners by mail and advise you to take your vehicle to a dealership to replace the brake booster.

High voltage

2023686 20 Dec 2023

Issue: On certain vehicles, a problem with high-voltage battery module(s) could cause the high-voltage battery to overheat. Safety Risk: A high-voltage battery that overheats could create a fire risk. Corrective Actions: Audi will notify owners by mail. As an interim repair, a dealer will inspect and, if necessary, replace the battery modules. Once the final repair is available, you will need to return to a dealership to install a software update for the high-voltage battery. This software will monitor the high-voltage battery and warn you if it detects a problem. To reduce the safety risk, Audi recommends that you set the maximum charge setting of your vehicle at 80% until the final recall repairs are completed.

Accessories

2023659 13 Dec 2023

Issue: Under certain conditions, the plug for the 220 V compact vehicle charging cable could become damaged by the house power outlet. As a result, the cable could overheat while charging. Note: This recall only affects electric and plug-in hybrid electric (PHEV) models. Safety Risk: Wiring that overheats could create a fire risk. Corrective Actions: Audi will notify owners by mail and advise you to take your vehicle to a dealership to replace the vehicle charging cable. For unsold vehicles, the dealer will remove the charging cable before they are delivered to consumers.

Listed for the model year, not checked against your VIN. Audi confirms which apply.

Check your VIN with Audi Canada or call a Audi dealer with your VIN.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 3 live listings, as of 27 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [5] Live public dealer listings on Cardog, as of 27 Oct 2026 |
| [3] NHTSA recall records (United States), listed for the model year | |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
