2 recalls listed by Transport Canada for this model year

Airbag

2021169 22 Mar 2021

Issue: On certain vehicles, the passenger occupant detection system (PODS) may not work properly. This could cause the airbag system to turn off the passenger-front airbag even when a person is seated in the front passenger seat. Note: This problem would cause an error message to display on the instrument panel and a warning chime to sound. The airbag indicator light would also display "passenger airbag off". Safety Risk: An airbag that is turned off when it should be turned on could increase the risk of injury to a passenger in a crash. Corrective Actions: Audi will notify owners by mail. The corrective actions for this recall are under development. To reduce the safety risk, Audi recommends that if the PODS in your vehicle is not working properly, you should contact an Audi dealer for assistance right away and not transport a person in the front-passenger seat until the PODS has been repaired.

Airbag

2017165 22 Mar 2017

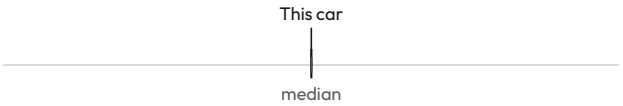

On certain vehicles, the airbag control module may not properly classify an out of position front passenger seat occupant. In the event of a crash, the airbag could deploy the front passenger airbag with more force than required, increasing the risk of injury to the front seat occupant. Correction: Dealers will update the airbag control module software.
