6 recalls listed by Transport Canada for this model year

Airbag

2024485 29 May 2024

Issue: On certain vehicles, the owner's manual incorrectly describes the function of the passenger airbag indicator light. Safety Risk: This error does not affect the safety or function of the airbag. Corrective Actions: This is not a recall. The company has made changes to ensure that all new vehicles have owner manuals that correctly describe the function of the passenger airbag indicator light. The company will also instruct dealers to add an insert to correct owner's manuals for all unsold vehicles.

Visual system

2022630 2 Nov 2022

Issue: On certain vehicles, after shifting into reverse or manually activating the parking function, the rearview camera image may not display. Canadian regulations require the rearview image to display when the transmission is shifted into reverse. Safety Risk: A rearview camera image that does not display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: The company will notify owners by mail and instruct you to take your vehicle to a dealership to replace the rearview camera.

Visual system

2022611 26 Oct 2022

Issue: On certain vehicles, the infotainment main unit in the center console could fail. If this happens, the display screen will not turn on when you start the vehicle and the rearview camera image will not appear when backing up. Canadian regulations require the rearview image to display when the transmission is shifted into reverse. Safety Risk: A rearview camera image that does not display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Audi will notify owners by mail and instruct you to take your vehicle to a dealership to replace the infotainment unit.

Airbag

2022481 29 Aug 2022

Issue: On certain vehicles, the passenger-front airbag may not have been folded properly. As a result, the airbag may not inflate properly in a crash. Safety Risk: An airbag that does not inflate properly could create an increased risk of injury in a crash. Corrective Actions: Audi will notify owners by mail and instruct you to take your vehicle to a dealer to replace the passenger-front airbag module.

Seats and restraints

2022383 20 Jul 2022

Issue: On certain vehicles, there may be a problem with the driver and front passenger seat belt pretensioners. As a result, the seat belt pretensioners may not work properly in a crash. Safety Risk: A seat belt pretensioner that does not work properly could increase the risk of injury in a crash. Corrective Actions: Audi will contact owners by mail and instruct you to bring your vehicle to a dealership to replace the driver and front passenger seat belt assemblies.

Seats and restraints

2022168 6 Apr 2022

Issue: On certain vehicles, the connection points for the lower universal anchorage system (UAS), for securing a child or booster seat, may not be labelled correctly on the rear seat. This could cause confusion when installing a child seat. Safety Risk: A child or booster seat that is not properly attached or positioned could increase the risk of injury in a crash. Corrective Actions: Audi will notify owners by mail and instruct you to take your vehicle to a dealership to replace the covers for the lower universal anchorage system (UAS) connection points in the rear seat.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
