Airbag 2017471 28 Sep 2017

On certain vehicles, the front passenger seat occupant detection mat can fatigue over time. As a result, the passenger airbag could deactivate, illuminating the airbag warning lamp and the passenger airbag ON/OFF lamp. Failure of the passenger airbag to deploy during a crash (where deployment is warranted) could increase the risk of personal injury to the seat occupant. Correction: Dealers will replace the occupant detection mat.

On certain vehicles, the front passenger seat occupant detection mat can fatigue over time. As a result, the passenger airbag could deactivate, illuminating the airbag warning lamp and the passenger airbag ON/OFF lamp. 2008307 26 Aug 2008

On certain vehicles, the front passenger seat occupant detection mat can fatigue during field usage depending on the seat configuration, vehicle geometry, manner and frequency of front passenger entry/exit. Over time micro cracks could develop in the side flanks of the mat, which could lead to a break of the conductive path and the system will recognize a failure and with exception of head protection system the front passenger air bag will be deactivated. The airbag On/Off lamp will be illuminated to make the occupants aware of the deactivation. Correction: The occupant detection mat will be granted a warranty extension of 10 years.
