§2 OBLIGATIONS [2]

cardog.app/tools/recalls/bmw/x2/2018

4 recalls listed by Transport Canada for this model year

Label 2024544 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

Brakes 2021777 16 Dec 2021

Issue: On certain vehicles, the tell-tale (warning light) for the antilock brake system (ABS) doesn't light up in the instrument cluster when you start the vehicle. Canadian regulations require the ABS tell-tale to turn on during the start-up sequence to tell you that the ABS is working. Note: The braking system will continue to work normally, and the ABS tell-tale will turn on when there is a problem with the ABS. Safety Risk: If the ABS tell-tale does not turn on during start-up, you may not know if the ABS is working correctly. A problem with the ABS will cause a warning message to appear on the vehicle's central information display screen, even if the ABS tell-tail fails. Corrective Actions: BMW will notify owners by mail and instruct you to take your vehicle to a dealer update the vehicle software.

Engine 2018497 13 Sep 2018

On certain vehicles, a crankshaft sensor error may cause the engine to stall. This would result in a loss of motive power, which could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the crankshaft sensor. Note: This condition would result in the illumination of the check engine warning lamp and an "engine malfunction" message appearing in the instrument cluster. Note: This is an expansion of recall 2018-373.

Lights and instruments

2017561 15 Nov 2017

Certain vehicles may not comply with Canada Motor Vehicle Safety Standard (CMVSS) 101 – Location and Identification of Controls and Displays. Due to a software error, the instrument cluster may not turn on when the vehicle is started. This could disable various control telltales and warning symbols, thereby failing to meet the requirements of the standard. This could also result in the driver not being aware of malfunctions, which could affect vehicle performance and increase the risk of injury and/or damage to property. Correction: Dealers will update the vehicle software.

Listed for the model year, not checked against your VIN. BMW confirms which apply.

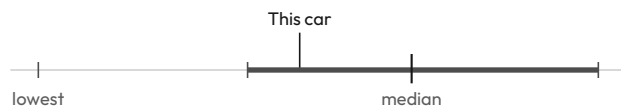

Check your VIN with BMW Canada or call a BMW dealer with your VIN.

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
