cardog.app/tools/recalls/bmw/i7/2023

8 recalls listed by Transport Canada for this model year

Brakes

2026321 1 Jul 2026

Issue: On certain vehicles, the recall repairs completed by a BMW dealer during Transport Canada recall number 2024-456 may not have been done correctly. As a result, another repair is required. On certain vehicles, a problem with the integrated brake system could cause reduced power brake assist. As a result, there may be reduced braking, and the antilock braking system (ABS) and dynamic stability control (DSC) may not work. Safety Risk: Reduced braking can cause extended stopping distances and could increase the risk of a crash. Additionally, antilock brakes and stability control systems that don't work could increase the risk of a crash. Corrective Actions: The company will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the integrated brake system.

High voltage

2025320 13 Jun 2025

Issue: On certain vehicles, a problem with the electric drive motor software could cause the vehicle to enter a fail-safe mode. If this happens, there could be a loss of power to the wheels. Note: This problem would cause a warning light to turn on and a warning message to be displayed. Safety Risk: A loss of power to the wheels could increase the risk of a crash. Corrective Actions: BMW will notify owners by mail and send a wireless over-the-air software update to eligible vehicles to update the electric drive motor software. Alternatively, you may schedule an appointment to have the update performed at a BMW dealership.

Label

2024544 15 Aug 2024

Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.

Brakes

2024456 12 Aug 2024

Issue: On certain vehicles, a problem with the integrated brake system could cause reduced power brake assist. As a result, there may be reduced braking and the antilock braking system (ABS) and dynamic stability control (DSC) may not work. Note: This recall replaces Transport Canada recall no. 2024-087. Safety Risk: Reduced braking can cause extended stopping distances and could increase the risk of a crash. Additionally, antilock brake and stability control systems that don't work could increase the risk of a crash. Corrective Actions: The company will notify owners by mail and advise you to take your vehicle to a dealership to replace the integrated brake system.

Electrical

2023561 18 Oct 2023

Issue: On certain vehicles, the steering wheel hands-on detection system may not detect when the driver removes their hands from the steering wheel. If the driver has an emergency and is unable to drive, the emergency stopping assistant system would not activate. Safety Risk: An emergency stopping assistant system that doesn't work in an emergency situation could increase the risk of a crash. Corrective Actions: BMW will notify owners by mail and advise you to take your vehicle to a dealership to inspect the steering wheel ground connection and, if necessary, tighten it.

Visual system

2023519 21 Sep 2023

Issue: On certain vehicles, the connection between the windshield wiper motor and windshield wipers could loosen and slip. If this happens, the windshield wipers may not work. Safety Risk: Windshield wipers that don't work could reduce visibility and increase the risk of a crash. Corrective Actions: BMW will notify owners by mail and advise you to take your vehicle to a dealership to inspect, and if necessary, replace the windshield wiper system.

2 more on the model-year record, cardog.app/tools/recalls/bmw/i7/2023

Listed for the model year, not checked against your VIN. BMW confirms which apply.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 2 live listings, as of 29 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [5] Live public dealer listings on Cardog, as of 29 Oct 2026 |
| [3] NHTSA recall records (United States), listed for the model year | |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
