Body	Van	Plant	Victoria, Andalusia, Spain

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/mercedes-benz/metris/2016

9 recalls listed by Transport Canada for this model year

Tires

2026167 2 Apr 2026

Issue: On certain vehicles, winter tires with the wrong load rating may have been installed. As a result, the tires may be overloaded. This could cause poor handling or a tire failure. Safety Risk: Poor handling or a tire failure could cause a loss of control and increase the risk of a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the winter tires.

Label

2022343 14 Jun 2022

Issue: On certain vehicles, the gross axle weight ratings (GAWR) are higher than the allowable maximum load for the tires. As a result, the tires could be overloaded. Driving a vehicle with tires that are overloaded could cause poor handling and/or a tire failure. Safety Risk: Poor handling or a tire failure could cause a loss of control and increase the risk of a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to replace the tire and loading information labels on the B-pillar and fuel filler door and provide you with an add-on for the owner's manual. The dealer will also inspect the tires and, if necessary, replace them.

Visual system

2022085 23 Feb 2022

Issue: On certain vehicles, the rearview camera image could freeze while backing up. Safety Risk: A rearview camera that doesn't display correctly could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Mercedes-Benz will notify owners by mail and advise you to take your vehicle to a dealership to have the rearview camera replaced.

Electrical

2019515 11 Oct 2019

Issue: Certain vans equipped with an integrated backup battery do not have a cover installed over the front passenger's seat base. As a result, if an object made of a conductive material is dropped into the opening, it could make contact with the battery terminals. This could result in a short circuit. Safety Risk: A short circuit could increase the risk of a fire. Corrective Actions: Mercedes-Benz will notify owners by mail and instruct them to take their vehicle to a dealer to install a cover over the front passenger's seat base. Consumers should not use a seat base with a battery as a storage compartment.

Steering

2019176 10 Apr 2019

Issue: On certain vehicles, the bolts that attach the electric power steering assist motor to the steering gear may corrode and break. This could cause a loss of power steering assist. Safety Risk: A loss of power steering assist would result in a sudden increase in steering effort, especially at low vehicle speeds. This could increase the risk of a crash. Corrective Actions: The company will notify owners by mail and instruct you to take your vehicle to a dealer to replace the aluminum bolts with steel ones.

Fuel system

2018654 28 Nov 2018

On certain vehicles, fuel may weep or leak from one of the lower connecting points of the fuel hose. If this occurs, a fuel odour may be detected inside the vehicle. Fuel leakage, in the presence of an ignition source, could increase the risk of fire causing injury and/or damage to property. Correction: Dealers will replace the hose and clamp at the lower connecting point of the transition hose, between the underbody fuel line and the Schrader valve, and replace the hose at the upper connection of the fuel line to the fuel pump.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 2 live listings, as of 29 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | [5] Live public dealer listings on Cardog, as of 29 Oct 2026 |
| [3] NHTSA recall records (United States), listed for the model year | |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
