### 1 recall listed by Transport Canada for this model year

#### Other

2008290 15 Aug 2008

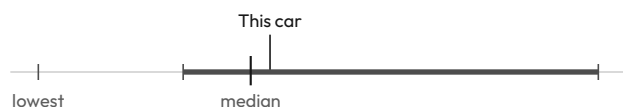

Certain vehicles equipped with Active Body Control (ABC) the sensors on the front struts may not operate within tolerances. As such, the sensor signal may not be accurately transmitted to the Electronic Control Unit (ECU). A variation in the transmitted values can result in one front strut adjusting to a value while the other does not adjust and presenting the driver with an uneven front suspension. This situation could have an effect on the vehicle's directional stability, possibly resulting in a vehicle crash with injuries or death. Correction: Dealers will inspect and replace affected AZ-sensors
