Build sequence

§1 IDENTITY [1]

Model year	2003	Engine	5.0 L, 8 cylinders
Make	Mercedes-Benz	Fuel	Gasoline
Model	SL-Class	Drive	Not in the decode
Trim	SL500	Maker	Mercedes-Benz Cars
Body	Convertible	Plant	Germany

§2 OBLIGATIONS [2]

cardog.app/tools/recalls/mercedes-benz/sl-class/2003

3 recalls listed by Transport Canada for this model year

Other

2008290 15 Aug 2008

Certain vehicles equipped with Active Body Control (ABC) the sensors on the front struts may not operate within tolerances. As such, the sensor signal may not be accurately transmitted to the Electronic Control Unit (ECU). A variation in the transmitted values can result in one front strut adjusting to a value while the other does not adjust and presenting the driver with an uneven front suspension. This situation could have an effect on the vehicle's directional stability, possibly resulting in a vehicle crash with injuries or death. Correction: Dealers will inspect and replace affected AZ-sensors

Brakes

2005094 4 Apr 2005

On certain vehicles, the Sensotronic Brake Control (SBC) unit may contain a pump piston which is out of permissible tolerances. Also, vibrations within the electrical connector may cause a loss of electrical continuity. Both conditions may result in the system reverting to hydraulic function mode. A loss of brake power assist would result in increased pedal effort and extended stopping distance. Correction: Dealers will inspect and, if required, replace the SBC pump unit.

Brakes

2004210 24 Jun 2004

The electronic monitoring system of the Sensotronic Brake Control (SBC) is designed to monitor the pressure gradient within the high pressure line of the brake system. If an unacceptable pressure gradient is detected, the system will switch, as it is designed to do, into the hydraulic function mode. DaimlerChrysler AG has determined that in certain instances, if vehicles are not routinely serviced and have extremely high mileage combined with a high number of brake actuations or a high brake actuation frequency, the pump motor of the SBC may run out of permissible tolerances, thereby triggering the hydraulic function mode. Correction: Dealers will re-program the SBC hydraulic unit. A software update will provide a clear maintenance notice on the vehicle display and assure continuous pump speed operation within tolerances.

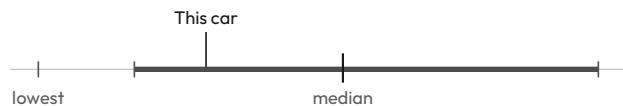

Listed for the model year, not checked against your VIN. Mercedes-Benz confirms which apply.
Check your VIN with Mercedes-Benz Canada or call a Mercedes-Benz dealer with your VIN.

| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 6 live listings, as of 28 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | |
| [3] NHTSA recall records (United States), listed for the model year | [5] Live public dealer listings on Cardog, as of 28 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
