3 recalls listed by Transport Canada for this model year

Label	2024544 15 Aug 2024
Issue: On certain vehicles, the tire and loading information label does not list that there is no spare tire in both official languages. The label reads as "NONE" when it should read as "NONE / AUCUN". Canadian regulations require the information to be listed on the label in both English and French. Safety Risk: This error does not affect vehicle safety. Corrective Actions: This is not a recall. The company has corrected the tire and loading information label for all new vehicles.	
Steering	2019412 14 Aug 2019
Issue: On certain vehicles, the steering tie rod ends may not be assembled correctly and could be missing a washer. Over time, this may cause excessive wear to the tie rod ends and cause them to break. This could result in a loss of steering control. Safety Risk: A loss of steering control could create a risk of a crash. Corrective Actions: BMW will notify owners by mail and instruct them to take their vehicle to a dealer to inspect, and if necessary, replace the tie rods and ball joints.	
Engine	2018497 13 Sep 2018
On certain vehicles, a crankshaft sensor error may cause the engine to stall. This would result in a loss of motive power, which could increase the risk of a crash causing injury and/or damage to property. Correction: Dealers will replace the crankshaft sensor. Note: This condition would result in the illumination of the check engine warning lamp and an "engine malfunction" message appearing in the instrument cluster. Note: This is an expansion of recall 2018-373.
