§2 OBLIGATIONS [2]

cardog.app/tools/recalls/porsche/taycan/2020

15 recalls listed by Transport Canada for this model year

Visual system

2025716 19 Dec 2025

Issue: On certain vehicles, a software problem could cause the rearview camera image not to appear on the display. Canadian regulations require the rearview image to display when the transmission is shifted into reverse gear. Safety Risk: A rearview camera image that doesn't display could reduce a driver's ability to see behind the vehicle while backing up. This could increase the risk of a crash. Corrective Actions: Porsche will notify owners by mail and advise you to take your vehicle to a dealership to update the driver assistance system control unit software.

Heater and defroster

2025572 20 Oct 2025

Issue: On certain vehicles, the recall repairs completed by a Porsche dealer during recall APA7 (Transport Canada recall no. 2023-313) may not be effective. As a result, a second repair may be required. On certain vehicles, the high-voltage electric heater could fail. If this happens, you may experience reduced cabin heat, and the windshield defrost system may not work properly. Note: This recall replaces Transport Canada recall no. 2023-313. Safety Risk: A windshield defroster that doesn't work may cause reduced visibility and increase the risk of a crash. Corrective Actions: Porsche will notify owners by mail. For certain vehicles, as an interim repair, Porsche will advise you to take your vehicle to a dealership to replace the passenger compartment high-voltage electric heater with a new part of the same design. When the final repairs are available, Porsche will notify owners by mail and advise you to take your vehicle to a dealership to replace the passenger compartment high-voltage electric heater with an improved part.

High voltage

2024582 2 Oct 2024

Issue: On certain vehicles, there could be a problem inside the high-voltage battery. As a result, the battery modules could overheat and short circuit. Note: This recall is an expansion of Transport Canada recall nos. 2023-661, 2024-180 and 2024-181. Certain vehicles that were repaired under these recalls also require this repair. Safety Risk: A short circuit in the high-voltage battery can create a fire risk. Corrective Actions: To reduce the safety risk, Porsche recommends that you set the maximum charge setting of your vehicle at 80% until the recall repairs are completed. Porsche will notify owners by mail. As an interim repair, a dealer will inspect and, if necessary, replace the high-voltage battery modules. Once the final repair is available, Porsche will notify you by mail and advise you to take your vehicle to a dealership to install an advanced diagnostic software that will monitor the high-voltage battery and warn you if it detects a problem.

Brakes

2024353 19 Jun 2024

Issue: On certain vehicles, the front brake hoses could fail and cause a progressive brake fluid leak. If this happens, you may experience a change in brake pedal feel and travel. This can cause reduced braking. Safety Risk: Reduced braking can cause extended stopping distances and increase the risk of a crash. Corrective Actions: Porsche will notify owners by mail and advise you to take your vehicle to a dealership to replace the front brake hoses.

High voltage

2024181 20 Mar 2024

Issue: On certain vehicles, there could be a problem inside the high-voltage battery. As a result, the battery modules could overheat and short circuit. Note: This recall is an expansion of Transport Canada recall number 2023-661. Safety Risk: A short circuit in the high-voltage battery can create a fire risk. Corrective Actions: Porsche will notify owners by mail and advise you to take your vehicle to a dealership to inspect and, if necessary, replace the high-voltage battery modules. To reduce the safety risk, Porsche recommends that you set the maximum charge setting of your vehicle at 80% until the recall repairs are completed.

High voltage

2024180 20 Mar 2024

Issue: On certain vehicles, there could be a problem inside the high-voltage battery. As a result, the battery modules could overheat and short circuit. Note: This recall is an expansion of Transport Canada recall number 2023-661. Safety Risk: A short circuit in the high-voltage battery can create a fire risk. Corrective Actions: Porsche will notify owners by mail and advise you to take your vehicle to a dealership to replace the high-voltage battery modules, as necessary. To reduce the safety risk, Porsche recommends that you set the maximum charge setting of your vehicle at 80% until the recall repairs are completed.

SOURCES

- | | |
|---|--|
| [1] Cardog identity register, decoded from the VIN | [4] Cardog market quote, same model year, 6 live listings, as of 27 Oct 2026 |
| [2] Transport Canada recall database, listed for the model year | |
| [3] NHTSA recall records (United States), listed for the model year | [5] Live public dealer listings on Cardog, as of 27 Oct 2026 |

STATEMENT OF SCOPE

This record is what public sources held about this vehicle when Cardog read it, each fact cited to its source. It read the VIN decode, Transport Canada's recall listing, NHTSA's recall records, Cardog's market quote and live public dealer listings. Recalls are listed for the model year, not checked against this VIN; the manufacturer confirms which apply. It is not a vehicle history or ownership report, and it carries no owner information.
